

# FLOOR TURN TABLE

Floor Turn Tables are widely used to reduce the cost of welding. To increase welding efficiency you need to be able to weld in the right position. Using Turn Table the operator can rotate the structure to optimum position. They provide precise positioning and smooth rotation. Rotation speeds are electronically controlled and infinitely variable.

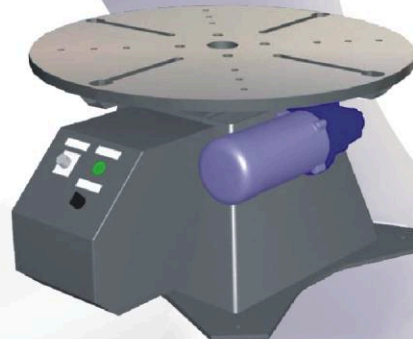

A covered on/off foot switch on 10 feet of cable provides hands free operating convenience. They're the ideal machines to increase both your productivity and profitability.
